Product Specification Sheet

Detachable 3-IN-1 Ethernet, phone and USB cable

Part #: ACC82EU

Product Description:

Stay connected on the road with the pocket-sized Targus Detachable Ethernet, phone and USB Cable. This 3-in-1 retractable cable manages multiple connections with a single, mobile unit. The combination of telephone, networking, and USB retractable cable connects to most USB peripheral devices and networks.
Designed to be compact and light for easy mobility, this cable also features DualPlug technology offering both telephone (RJ11) and LAN (RJ45) cables in one connection as you can switch from one to the other by simply sliding out the sleeve without the need for any additional adapters. To complete the list of impressive capabilities, the detachable feature provides even more flexibility for users. This enables the unit to be split into two separate units, providing a USB cable and Networking/Phone cable. All your essential connections in one user friendly solution.

Product Features and Specifications:

- Phone, Ethernet and USB connection: Quick-release adapters convert Ethernet (RJ-45) to telephone clips (RJ-11); also includes USB 2.0 cable
- Retractable and detachable cables: Cables retract and adjust to the desired length; cables can also be detached for simultaneous use
- All-in-one unit: Connect to Ethernet networks or analogue modems and USB devices at the same time
